DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Note the claims are replete with 35 U.S.C. 112 2nd paragraph rejections a few examples as follows.

Claim 1 recites the limitation "the frame" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the plane" in line 17. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 the word "closed fourfold linked chain" in lines 7 and 12 is unclear, the examiner suggests removing the word "closed fourfold linked chain" and replacing it with "closed fourbar linkage".

Regarding claim 1, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225

Art Unit: 3618

USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6, 755,425.

Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Claim 1 of Patent No.6, 755,425 claims the direction of the rotation axis of the first cross guide is at an acute angle α to the direction of four pivot axes of the at least four links of the link chain. Application No.10/779,406, bore-holes being now positioned so that the said rotation axes each make a solid angle β to the plane which is defined by being perpendicular to the wheels axes and by being located in the middle of the distance between the two wheels of the wheel pair. Examiner assumes that angle β in application No.10/779,406 could be zero, which is inherently the same angle β disclosed in claim 1 of Patent No.6, 755,425.
